## CARE AND MAINTENANCE

Showerwall is more hygienic and easier to maintain than tiles. The nonporous surface provides excellent protection against bacteria, especially in the areas between tiles that are traditionally grouted.

Showerwall Anti-bacterial cleaner kills germs and keeps hard surfaces clean without scratching and is recommended for the optimum life and performance of your Showerwall panel.

Abrasive cleaners and bleaches must not be used on Showerwall panelling. Sealant needs to be replaced at regular intervals - failure to do so may cause water ingress and subsequent panel damage.
